DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 25, 2010 has been entered.

Information Disclosure Statement

2. The Official Actions listed information disclosure statement (IDS), filed June 25, 2010, have been considered but are not appropriate for printing on the face of the patent. Thus, the documents have not been initialed.

Allowable Subject Matter

3. Claims 27, 28, 37, 66-74, and 76-86 are allowed.

4. The following is an examiner's statement of reasons for allowance: The prior art does not teach a method for treating an ocular disorder comprising inserting at least two implants through a physiologic outflow pathway of the eye (through a wall of Schlemm's canal or uveal scleral outflow path), wherein the implants convey aqueous humor from an anterior chamber of the eye to a fluid outflow path of the eye. Yu et al. (US 6,544,249) teach a method of delivering an implant through a physiologic outflow path

of the eye to convey aqueous humor from an anterior chamber of the eye to a fluid outflow path of the eye. However, Yu et al. only disclose delivering a single implant and do not teach delivering multiple implants with the same instrument. Lynch et al. (US 6,464,724) disclose a method of delivering multiple implants (stents) about the circumference of Schlemm's canal to maintain the patency of Schlemm's canal. However, the implants do not extend through the wall of Schlemm's canal to convey aqueous humor from an anterior chamber of the eye to a fluid outflow path of the eye. Upon further consideration, it would not have been obvious to modify the method of Yu et al. in view of the teachings of Lynch et al. to deliver an additional implant through a physiologic outflow path of the eye at a second location, since the methods of each reference serve entirely different functions and are site-specific.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
